

AIRplus® Wrap film – flexible wrapping and optimum protection

You send your product on a journey – we provide the perfect product protection with our AIRplus® Wrap film

Your products can experience a variety of hazards during transportation from exposure to knocks, scratches, vibration damage, or even being dropped. Our AIRplus® Wrap film can be used to protect and wrap your fragile and delicate products tightly and securely thanks to its innovative wavelike structure. AIRplus® Wrap provides a space saving solution with on-demand production allowing packers to create protective packaging material directly at the pack station, unlike conventional air bubble wrap which needs to be continuously transported to the pack station and has huge storage implications.

Our AIRplus® Wrap film at a glance

Benefits

- Allows items to be wrapped tightly and securely
- Available in two widths: 400 mm and 710 mm
- On-demand production directly at the packing station
- Space-saving alternative to pre-inflated air bubble wrap which is conventionally delivered on large rolls
- Significant reduction in warehouse storage and increased operator efficiencies

Application uses

Storopack – Perfect Protective Packaging

Wherever your products are needed in the world, we will make sure that they are well protected during transportation.

Place your trust in the protective packaging solutions from Storopack. For more information on AIRplus® films and Storopack machines, go to www.storopack.com.au.
